J. J. HILL. IT IS UNDERSTOOD, WILL BE THE PRESIDENT.

pirectors of C., B. & Q. Also Announced -Traffic Partition Arrangements Awaited With Interest-Cash Benefits of U. P.-Trading in New Stock.

The shareholders of the \$400,000,000 Northern Securities Company, which was chart-ered in New Jersey last Wednesday for the purpose of holding the capital stocks of the Northern Pacific and the Great Northern Railroad Companies, met in this city yesterday and elected the following Board of Directors:

John S. Kennedy, James J. Hill, George F. Baker, Robert Bacon, D. Willis James, Samuel Thorne, George W. Perkins, Daniel S. Lamont, E. H. Harriman, Jacob H. Schiff, James Stillman, W. P. Clough, George C.

Clark and Nicholas Terhune.
It is stated that James J. Hill will be the President. Five members of the boardthe Messrs. Hill, Kennedy, Clough, Nichols and Terhune-are either directors or officers of the Great Northern Railway system and Col. Daniel S. Lamont is a close friend of Mr. Hill. The Union Pacific interests are represented in the new board by E. H. man and the Morgan interests by George Baker, Robert Bacon and George W. Perkins.

The preponderance of membership in the Northern Securities directorate was plish this by chemical means. conceded to Mr. Hill because the Great Northern stockholding interest in the new company will be much larger than that of the Northern Pacific. All persons chiefly concerned declare, however, that the purpose of this big corporation is unity of interest and not division of interest. Mr Harriman authorized the statement that the idea was not to pick out so many men for the Union Pacific, so many for the Great Northern and so many for the Northern Pacific, but rather to form the strongest em Pacilic, but rather to form the strongest and most harmonious combination possi-ble, representing the joint interests in-volved. Both Mr. Hill and Mr. Harriman may that so far as they can see all cause for dissension and jealousies between the Great Northern, Northern Pacific and the Union Pacific interests has been all prints to de-Union Pacific interests has been eliminated.

There is good authority for the statement that the Union Pacific party will hold one-half of the voting power in the management of the Chicago, Burlington and Quincy through the medium of a voting trust. The stringent regions of the chicago, the content of the chicago, the content of the chicago, the chicago is the chicago of the chicago in the chi The stringent railroad laws of the Western States render it impracticable for the Union Pacific Railroad Company to appear as part owner of the Burlington system, which parallels and competes with the Union Pacific at several points. A member of the Harriman syndicate said that questions pertaining to distribution of traffic had entered largely into the settlement of the Northern Pacific Burlington

ment of the Northern Pacific-Burlington controversy. It is believed by the parties to this settlement that some of the most troublesome traffic questions of recent years have been amicably disposed of No statement of details is to be made, No statement of details is to be made, however, until the traffic managers get ready to put the new plans into operation. It was expected in this city that the new Board of Directors of the Chicago, Burlington and Quincy Railroad would be formally announced at the adjourned meeting held in Chicago yesterday. Through a misunderstanding of a long distance telephone message the Chicago meeting adjourned until next week. LIGHT FROM DECAYED MEAT Prof. Gorham of Brown Can Take Photographs by This Means.

PROVIDENCE, R. I., Nov. 14.-There was once a widely-advertised school of scientists who tried to get sunbeams from cucum-They were not in the same class with the scientist of Brown University, who is to-day seeking to extract illumination from decayed meat. The man engaged in this attempt is Prof. Frederick P. Gorham of the biological department of Brown University. He has been occupied with his researches for some time and has reached a point where he is able to take old porterhouse steak and cause it to emit enough light for the taking of photographs. In time the professor hopes to get along without the steak, although he finds it essential at present in his investigations. A reporter was privileged to see this Harriman, Jacob H. Schiff and James Still- afternoon the results of his study. The substance of the problem which is occupying Prof. Gorham's mind is the production of the greatest amount of light with the smallest of heat, and he hopes to accom-

> Having set forth the problem, Prof. Gorham thought that there is a kind of animal phosphorence which so far as known is entirely devoid of heat. This is the light observable in glowing summer seas, in fire flies, in decaying vegetation or decaying flesh. Science has long known that the phosphorence of the seas, of wood and meat was from minute animal and vegetable organisms. Prof. Gorham obtained light from the organisms in a piece of decayed meat which he transferred to test tubes containing gelatine.

"The light these organisms produce from oxidation," said Prof. Gorham, "just as the heat of our bodies is from oxidation. It is a chemical action. I have been experimenting to find what materials would produce the greatest quantity of luminosity in these small bodies, and have now reduced their diet to three chemical salts, the principal being ordinary table salt or sedium chloride. Another of the salts contains nitrogen, which is essential to the production of light, and there is a little sulphur, which I believe could be eliminated without bad results."

The professor showed his flasks containing the organisms and from them produced a vivid greenish glow. The professor said he had taken several photographs by the aid of the light. His search is now confined to the discovery of the chemicals which will take the place of the organisms.

EARLINGTON, Ky., Nov. 14.-Now that the United States courts have acted in the matter of breaking up the anarchy which has existed here in Hopkins county for the last three months the authorities of Kentucky seem to be waking up to the disgrace of the State. Adjutant-General Murray came down here on last Tuesday. There was then not much doubt that Judge Evans of Louisville would grant the injunction against the lawless miners in camps and their operations which in fact he did grant on the day following. To-day Adjutant-General Murray reported to Gov. Beckham over the long distance telephone and recommended that a battery of artillery and other troops be sent into Hopkins county at once.

In addition to this Judge Hall of Madison ville, and H. H. Holman, a banker who recently was Mayor of Madisonville and is a personal and political friend of the Governor, also sent telegrams to the Chief Executive of the State urging that troops be sent and that the armed camps of outlaws be broken up without further delay. To these communications Gov. Beckham

replied that he thought the suggestion was good. He did not say, however, when he would send the troops or in fact that he would send them at all. It is the belief, however, that the troops will come. Now that the election is long over and that all the politics possible has been squeezed out of the situation by demagogues there seems to be nothing in the way of substituting law and order for mob rule and mob intimidation.

Further than that it is now apparent that if the authorities of Kentucky do not move the United States courts will and if that does not suffice the executive arm that does not suffice the executive arm of the United States Government will take a hand in the matter. Two United States Marshals left Frankfort this afternoon bearing the order of the court issued by Judge Evans yesterday. They will arrive in Madisonville late to-night and early to-morrow morning will go out to the armed camp which commands the Reinecke mine in the outskirts of the town. Here they will attempt to serve the order. If they are resisted or blocked in the performance of their duty deputy United States Marshals will be sworn in.

of their duty deputy United States Marshals will be sworn in.

There will be no trouble in getting as large a posse of such deputies as is necessary. The people of Madisonville have been wrought up to a high pitch of exasperation by the outrages of the armed bands of invaders from other States and counties that so long have harassed not only the men who work in the mines, but citizens of all kinds. Strangers who have visited the county and have learned from personal observation the impossible have visited the county and have learned from personal observation the impossible conditions that exist here have expressed surprise that the decent people of the community have so long restrained themselves under provocation of a nature to test their law-abiding instincts to the utmost.

ODELL RELENTS AS TO BIEWELL. THE CLUB JOLLIES CROKER Offers to Repair Any Harm He May Have Done-No Hurry, Says Platt.

Gov. Odell and Senator Platt had a little talk yesterday about Collector Bidwell It is well known that Secretary Gage and Assistant Secretary Spaulding of the Treasury Department at Washington, Senator Platt and Senator Depew, and a majority of the merchants and importers of New York favor the reappointment of Mr. Bidwell. Moreover, President McKinley, on April 29 last, reappointed Collector Bidwell for a term of four years. President McKinley made this reappointment two months before Collector Bidwell's term expired. The United States Civil Service Commissioners at Washington have reported that Collector Bidwell's administration has been faultless in the matter of adhering to the civil service rules.

Gov. Odell, so it is announced, said to Senator Platt yesterday, that he, the Governor, was ready and willing to go to Washington and repair any injury he might have done Collector Bidwell in the estimation of President Roosevelt. Senator Platt replied, it is said, that he did not believe there was any hurry about the matter, that he understood that if the President decided to make any changes in the Federal offices in this city they would not be made much before April 1. Gov. Odell went to Newburgh last night, and will return to this city to-day.

LAWLESSNESS AT KEY WEST. Federal Government to Try to Stop Union Labor Terrorism.

TAMPA, Fla., Nov. 16 .- The United States Government, through the medium of the Treasury Department, now intends to take a hand in quelling the alleged lawlessness at Key West that has prevented cigarmakers from there coming to Tampa work. For several weeks the officials of the Resistencia labor union at Key West, most of them being the deported leaders from here, have been having matfrom Tampa went there two weeks ago to get cigar workers they were forced to leave by a hooting, howling mob, the city authori-ties there saying that they could not protect them. Later, when cigarmakers came over from Havana, they were taken off the boats at Key West, thrown into the water, and force was used to keep cigar-

water, and force was used to keep cigarmakers from this city.
Forbearance ceased to be a virtue, and
Col. Anderson, President of the Exchange
Bank, went to Washington with a strong
memorial from the Board of Trade hero
reciting the lawless proceedings at Key
West. He also had an interview with T.

Even a Squint at State Leadership-He Says the Republicans Licked Him -Compliments for Mayor Van Wyck Also-He Is Very Grateful for Them.

Richard Croker was the guest of honor last evening at a dinner given at the Demo-cratic Club by the Board of Governors and the officials of the club. At the conclusion of the dinner, and before the speaking, which was entirely impromptu, began a silver jardinière was presented to Mr. Croker, President John Fox making the presentation speech.

President Fox, on behalf of the club, hanked Mr. Croker for his services as leader of the party in this city and for the work he had done in behalf of the club. The jardinière bears the names of the givers of the dinner, namely, John Fox, Lewis Nixon, Cord Meyer, Adrian Kiernan, Theodore Hascall, William E. Wyatt, James H. Shevlin, John F. Carroll, O. H. P. Speeches were made by nearly every one present. The trend of them was to the effect that Mr. Croker would undoubtedly be the leading spirit in the movement to unite the Democratic party in the State and lead it to victory some day in the municipal elections. To the speech made by President Fox

in presenting the jardinière Mr. Croker replied briefly. He thanked the club officials for the gift, and said he appreciated far more the sentiment that caused its presentation.

He asserted that the party had met defeat at the recent election through the work of the party's opponents in the Republican ranks and declared that much

The application was made yesterday at the meeting of the New East River Bridge Commission and was referred to Engineer Buck for consideration. LOW, JEROME AND GROUT AT CITY CLUB DINNER.

Mayor-Elect Says Fitness Will Rule In Appointments, but as Far as Possible He Will Choose From Those Who Helped Overthrow Wigwam-Grout Not to Bounce All Tammany Men-Tribute of District Attorney-Elect to East Side.

The City Club gave a great, triumphal dinner last night to Mayor-elect Low, Comptroller-elect Grout, President-elect Fornes of the Board of Aldermen, District Attorney-elect Jerome and to all the fusion forces which these gentlemen led to victory in the late campaign. The dinner was in the Madison Square Garden concert hall. The room was as crowded with tables as it could well be. At them were seated men known in every walk in life in New York from labor delegates to corporation lawvers.

In the two galleries were gathered hundreds of women. Some of them were members of the families of the men at the tables below and others were women who have worked hard and long by their own efforts to bring about the victory which was the occasion of the celebration. The walls and the sides of the hall were covered with great American flags. The stage, on which sat the principal guests and the speakers, was banked with great palms. A band was stationed behind the palms.

Mr. Low's speech was a clear-cut promise of non-partisan government for New York work administration. He said with some feeling that if there were only more Warings in New York he could make his promise more definite. He said that this next two years was to be not only a term of effort for the good of the adult population of the city, but especially for the benefit of the children, that their homes, their schools and their places of recreation might all ten better citizens than they would have been had fusion not been successful.
